SAE 2021 INTERNATIONAL AUTOMOTIVE SECURITY, SAFETY & TESTING CONGRESS

MAY 27-28, 2021 SORL HOTEL SHANGHAI

Electrification, Intelligent, connectivity is leading the technological transformation of the automotive industry, the vehicle generally turns its ordinary profile into intelligent mobile terminals to bring entertainment, information and connectivity.

With the ongoing research and development, more and more people realize that neither Electrification nor Intelligent is going smoothly, a series of challenges are needed to be faced and the security problem is the crucial one. This makes it urgent to develop international discussion and cooperation, to address challenges with global wisdom and promote the automotive industry sustainable development and upgrading.
